

## Optec Launches SwiftTerm™ SC No-Polish Connector with Innovative Ceramic Ferrule C-Slot Design for a Reliable Field-termination

**HONG KONG, November 15, 2012** - Optec Technology Limited, a leader in fiber optic interconnect and assembly products, today announces the availability of SwiftTerm™ SC No-Polish Connector. This pre-polished, pre-assembled connector is uniquely designed for a quick, easy and reliable field-termination. It eliminates the need for epoxy, hand polishing and crimping at site, thus minimize the chances of operator errors and maintains higher process yield. Featured with only 3 components, it provides efficient field terminations in less than half the time of conventional field polish connectors.

The SwiftTerm™ SC No-Polish Connector features innovative ceramic ferrule C-Slot design that secures highest precision on fiber alignment. This unique patent design facilitates the fiber interconnections inside the ferrule holes, it resolves the fundamental problems with conventional V-Groove option. Not like plastic V-Groove structure that is easily deform and leads to high optical loss, our ceramic ferrule with C-Slot design can guarantee the highest precision on fiber alignment while avoiding deformation and deterioration. With ceramic inner structure, SwiftTerm™ SC No-Polish Connector can sustains high stability in thermal expansion and contraction in extreme temperature of  $-40^{\circ}\text{C} \sim +85^{\circ}\text{C}$ , assures minimal change of insertion loss value under extreme temperature change.

### **About Optec Technology Limited**

Optec Technology Limited is the world's leading fiber termination solutions provider which serves extensive optical networks throughout public and private sectors. Its wide variety of multifibers products includes board mounted solution for embedded optical modules, high-density 40G/100G applications, to MT-based outdoor harsh environment solutions. Please visit [www.optec.com.hk](http://www.optec.com.hk) for more information.
